

Railing & Lighting

aluminum inserts for strength • LED technology

Genovations® PVC Railing systems come in 4 different, elegant styles: Square, Deluxe Square, Colonial, and Glass. Aluminum channels support the top and bottom rails. Die-cast metal brackets eliminate the need for support blocks. All our railing is built with high quality materials designed to last a lifetime. PVC construction ensures it is low-maintenance. We are so confident it will not chalk or fade that we back it with a lifetime warranty.

Barefoot Friendly

Won't Mold

Won't Stain

1 BAREFOOT FRIENDLY

Genovations® is a relief thanks to inner channels and UV reflectants that reduce heat retention. Surface temperatures are cooler than wood, wood composite, or cellular PVC decking. ADA (Americans with Disabilities Act) approved, Genovations® is strategically engineered with raised wood grain to be a non-slip surface, so you can walk on it confidently wet or dry.

2 INSTALL ON CONCRETE

Competing products require 6" to 24" of free air flow. Because Genovations® has no foam or wood fillers, you can install it directly over concrete without the expense and hassle of building a frame. Great for docks and other cement slab applications.

3 BEAUTIFUL & GAP-FREE

Genovations® is a tongue & groove board, 3-component deck system. Automatic aligning and spacing creates an attractive, gap-free, finished-floor deck without expensive or exposed fasteners. The same reflectants that make it cooler to the touch protect against fading, and 100% PVC construction means stains are a thing of the past.
